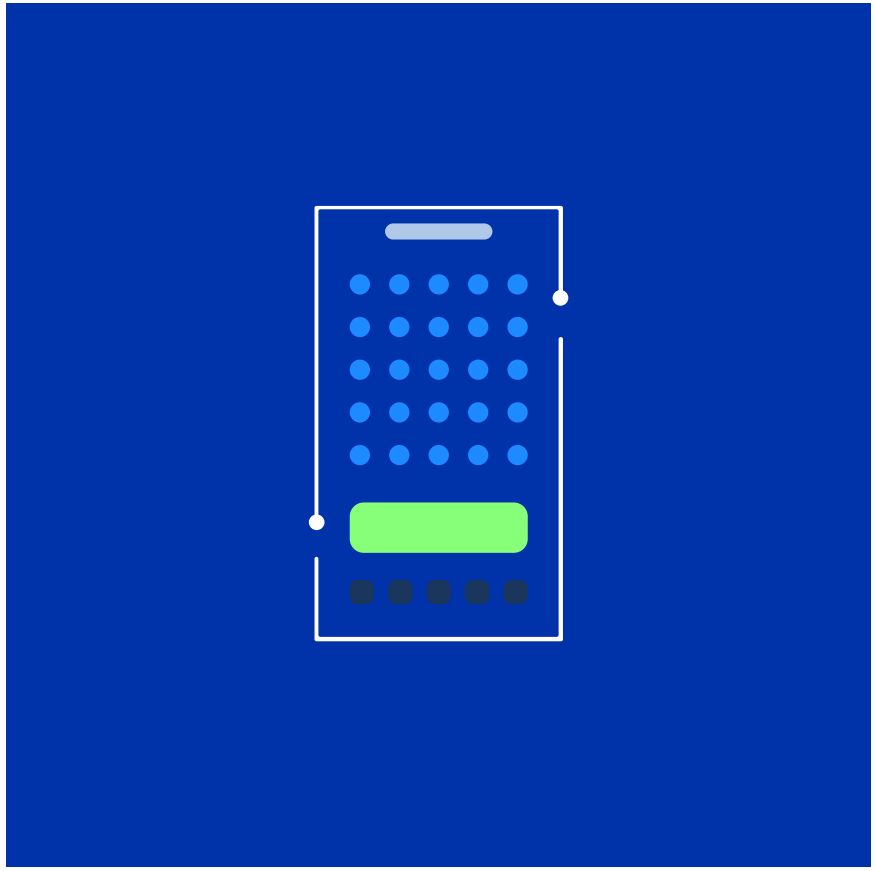
About MonkDB

1

MonkDB exists to conquer data chaos, blending models into a unified, planet-scale powerhouse.



About Us

Founded in 2025, MonkDB is a leading AI-native distributed columnar multi-model database handling planet-scale data volumes. The company is helping enterprises unify diverse data models from relational to vector and time-series into a single stack, eliminating tool zoos and data islands. Built on three years of deep research, MonkDB delivers seamless scalability, AI-powered querying, and effortless integration for modern data workloads.

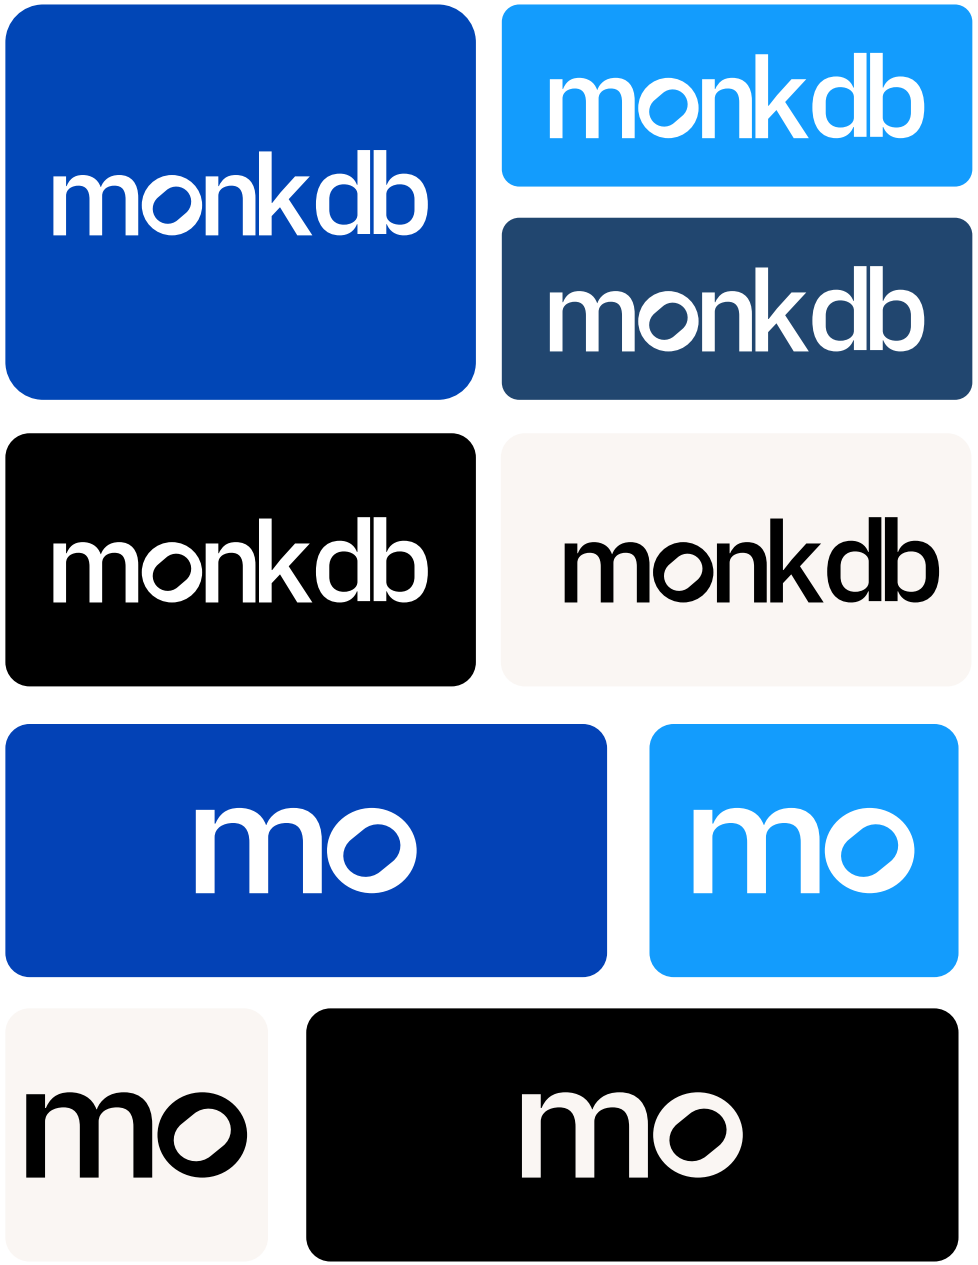
Brand Elements

Wordmark & Brandmark

At MonkDB, we drive agility, insight, and analytical breakthroughs. Our logo's ***O***, a steering wheel in the wordmark captures relentless momentum, propelling us right and forward as an AI-native, distributed columnar multi-model backend for planet scale data, unlocking boundless possibilities.



Palette

3

Note: When PMS are not available or not matching very closely, we request the print vendor to use CMYK scheme to match our hex palette.

Color Palette

Overview

MonkDB's primary color, Egyptian Blue, anchors the palette with a bold, confident blue that symbolizes strength and reliability. Complemented by vibrant Dodger Blue and deep Oxford Blue, the palette balances energy with professionalism. Soft neutrals like Powder Blue and Parchment, plus crisp White and Black, provide clarity and versatile contrast for a clean, modern brand identity.

M-Egyptian Blue	C100, M70, Y0, K33	75-1-7 C	#0033AA
M-Dodger Blue	C86, M46, Y0, K0		#1E8AFF
M-Oxford Blue	C71, M42, Y0, K64	534 C	#1B365D
M-Powder Blue	C24, M13, Y0, K9	2707 CP	#B1C9E8
M-Parchment	C0, M2, Y3, K3	P 179-1 C	#F8F4F0
M-White	C0, M0, Y0, K0		#FFFFFF
M-Black	C0, M0, Y0, K100		#FFFFFF

Typography

4

Note: These fonts can be downloaded from Google Fonts web app.

Type Interfaces

Usage of Typeface

MonkDB's typography system is built around IBM Plex Sans, using Regular for most text and **Bold** to emphasize key messages, ensuring clear hierarchy and readability. `IBM Plex Mono` is reserved for coding, technical details, and data points, providing precision and clarity for monospaced content. Together, these fonts create a professional, approachable, and versatile typographic voice for MonkDB.

Partner Ecosystem

5

Complementing Partner Logo

Usage Guidelines

MonkDB believes in partner ecosystem to deliver a wholesome and positive change to how data is managed and optimized. This page showcases how to showcase partner logos and icons alongside MonkDB's logo and icon. They must be shown in either white background or our primary blue background.

Note: Always use SVG versions of our partner logos.

Don'ts

6
